

QVI Sales Analytics Report

Prepared for: Zilinka, Category Manager

Executive Summary

This report outlines the purchasing behavior of customer segments to identify key drivers of chips sales. The insights are derived from transaction data to help optimize inventory and targeted marketing strategies.

Top 3 Business Insights

1. High-Value Segments

While 'Older Families' and 'Older Singles/Couples' drive the most total sales volume overall, the '**Mainstream - Young Singles/Couples**' segment remains a highly valuable target group for strategic growth.

2. Brand Preference & Affinity

Within our target group, **Kettle** is the absolute top-selling brand (\$35.42K). However, this demographic shows the highest unique affinity (1.15x) for **Tyrrells** compared to the rest of the population.

3. Pack Size Dominance

The **175g** pack size is overwhelmingly the most popular choice among the target demographic, generating \$37.97K in sales, followed distantly by the 150g size.

Strategic Recommendations

- **Marketing Campaigns:** Target the 'Young Singles/Couples' segment with promotions for 'Kettle' chips in the 175g pack size to maximize conversion rates.
- **Inventory Placement:** Increase shelf visibility for 'Tyrrells' chips in locations frequented by the target demographic, capitalizing on their high brand affinity.
- **Stock Optimization:** Prioritize 175g and 150g pack sizes in the supply chain over extremely small or large sizes to meet customer demand efficiently.
